Many are now arranging flying vis its to Cairo and the pyramids. The news of the Italian earthquake was received with profound sorrow by officers and men. In reply to a message from the navy department, Rear Admiral Sperry said that he had supplies wailable for distribution to the Italian caribquake sufferers as follows: Beverages, 50,000; bread, 690,000 pounds; cereals, 60,000 pounds; fruits, 90,000 fresh meat, 90,000 pounds; ounds: other meat, 10,000 pounds; vegetables carned, 800,000 pounds; milk, 50,000 the Suez canal was announced in a rounds, and other numerous items. The Culgoa will distribute these

the Culgoa and Yankton, and they are taking with them supplies of cots. due to arrive at Messina January 8

The American fleet is the most pow erful ever to pass through the Suez canal and will give a new test of the capacity of the great artificial water-way. Great Britain often has sent strong squadrons to the east along this road, but none has been more than one-half as large as the American fleet.

the Mediterranean has been the object of curious study by European adadmiralty called attention some weeks ago, when war in the Balkans was that the United States would have a force in the eastern Medbalance of power in the event of nathough this may appear a fanciful sug-

as safe even for 16,000-ton vessels, will be splendid and in part dull, but such as the Connecticut class, which ever has gone through it. None of the British Dreadnaught type have made nally provided for vessels of draughts of twenty-four feet seven inches, has been deepened somewhat more than twenty-eight feet. Vessels of the zaleb is one thousand square miles in Connecticut class require twenty-six area and through the channel is feet nine inches. When the present marked by buoys. Flocks of pelican thirty-one feet depth over a floor of marshes one hundred and twenty feet. The biblical waters of Marah. Port Said one hundred and thirty-five feet wide, nal, with a population of 49,000, is al got through with only two feet in nost wholly a commercial growth to

ful places where the wash in sandy cuttings tends to fill in the channel, but for the greater part the soils are teracious and the channel dependable. steam. The speed is limited to six miles an hour. By using electric lights many vessels pass through by night. The canal runs free from sea to sea with a slight ebb and flow of the tides, following roughly the course of an Egyptian canal of five centuries

Leave to go through the Suez canal will cost the United States government, with quarantine and other due not far from \$115,000. The regular toils are \$1.47 per ton. British ship companies are continuously complaining against this rate, which, they ave is unreasonable. The Sucz Cana company's rate of dividend on \$10,600. 060 has been from 24 to 28 per cen for a number of years.

The views which the officers and men of the American fleet will have in passing through the capal in part always interesting in the historical background. Suez itself is a sordid, dirty port yet Mount Sinai rises far on the left, and a violet-colored mona-

tain range on the right. The canal cuttings run through some dreary expanses of sand, but the way flamingoes, and herons feed in the The Bitter lakes are th
